

JULY 2008  
SPECIAL EDITION

# *PrePass Update*

## ATTENTION INTERSTATE CARRIERS

### STATES BEGIN UCR ENFORCEMENT

States participating in the new Unified Carrier Registration (UCR) program began enforcement on July 1! To prevent your trucks from suddenly being pulled in at weigh stations in these states, please ensure your company has registered.

The good news is that UCR registration is easy! You can pay your fees online at the national UCR website, developed and maintained by the Indiana Department of Revenue, at [www.ucr.in.gov](http://www.ucr.in.gov).

Fortunately, there is no UCR credential that must be carried in your vehicles and nothing you need to send us. PrePass will be electronically updated on the status of your registration. Please have your company register as soon as possible though, in order to avoid possible interruption of your PrePass service.

## PrePass Reminder: Changeable Message Signs

Drivers who encounter changeable message signs which conflict with their PrePass devices are instructed to **follow their in-cab signals**. For example, a sign indicating that all drivers must pull-in at a particular weigh station can be ignored if your vehicle's PrePass transponder shows a green light at that site.
