## A Look Back at 2005

An exceptional year of Productivity and Growth

As we start the New Year, PrePass reflects on some major milestones in 2005. PrePass has provided the trucking industry key bottom-line savings, and as a result, productivity that stimulated commercial transit across America's major routes.

Translating our customer's activity into benefits, during 2005 PrePass saved more than:

- **3.73 million hours of driver time**
- **22.4 million gallons of fuel**

Over 15,000 carriers have joined the PrePass family in 2005, adding over 39,000 additional trucks. Also within the past 12 months, PrePass has added 8 new sites within 5 states. In all, PrePass now has more than 60,000 carriers representing over 355,000 trucks in the PrePass system bypassing hundreds of weigh stations per day.

Due to outstanding customers like you, PrePass continues to be the largest weigh station bypassing service in America!
